VERSION WITH MARKINGS TO SHOW CHANGES MADE

IN THE CLAIMS:

1. A method for forming water-soluble <u>silver ion releasing</u> glass fibers, the method comprising providing a composition suitable for producing a water-soluble <u>silver ion releasing</u> glass and heating said composition above the melting point of said glass to form a molten glass, cooling at least a portion of said molten glass to a preselected working temperature, <u>maintaining the temperature of the portion of said molten glass at the working temperature</u> and then processing said molten glass having said working temperature into fibers.

Claim 9 has been cancelled.

10. A method as claimed in Claim <u>1</u> 9 wherein silver orthophosphate is added during manufacture of the glass as a source of silver ions.

Claims 16 to 20 have been cancelled.
